Storm Water Information

Water from rain and melting snow that flows over lawns, parking lots and streets is known as stormwater runoff. This water, which travels along gutters, into catch basins and through storm drain pipes and ditches, usually is not treated, but then flows or is discharged into local waterbodies. Along the way, stormwater picks up trash. This polluted stormwater can kill fish and other wildlife, destroy wildlife habitat, contaminate drinking water sources and force the closing of beaches because of health threats to swimmers.

Stormwater flows directly into our rivers, lakes, streams and ocean or into a stormwater system through a storm drain.

What can I do to help?

- Keep leaves and grass out of the storm drains
- Recycle used motor oil
- Don't litter
- Reduce, re-use and recycle
- Never dispose of pet waste down a storm drain
- Properly store fertilizers and pesticides
- Don't feed geese, ducks or other forms of wild life in public areas.

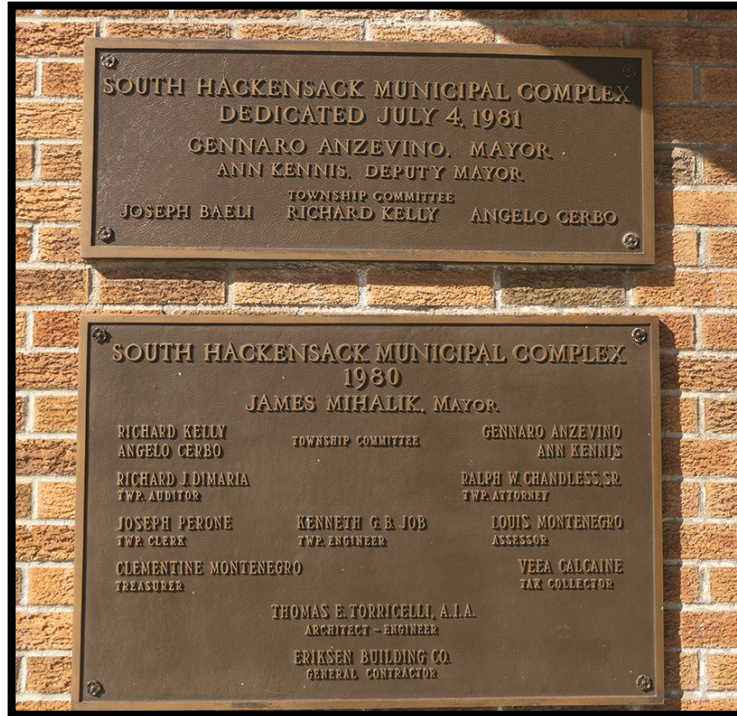

Department of Public Works (DPW)

- The South Hackensack DPW collects newspapers and leaves. In addition, they are responsible for park maintenance , leaf and snow removal and other duties to keep South Hackensack looking its best. Garbage is collected by an outside contractor.

- Emergencies such as sewer back-ups or fallen trees should be reported to the South Hackensack Police Department at 201-440-0042.
